INTRODUCTION

The annual Criminal Justice Profile series summarizes and combines data describing the many facets of California's criminal justice system. Separate publications are available for each county and the state. Much of the data presented in the Statewide Profile supplements the Bureau of Criminal Statistics (BCS) annual Crime and Delinquency publication. This is available upon request. Criminal justice data not provided in either the Profile series or the Crime and Delinquency report may be available from the Bureau on a special request basis.

Each Profile consists of two sections. The first section displays annual criminal justice data in tabular form for 1970 through 1979. The second section contains reference tables displaying selected data for 1979.

CRIMINAL JUSTICE DATA

Trend data in the Profile are reported to BCS by state and local agencies and have been summarized for each year. This section provides the individual county or statewide totals for selected criminal justice activities in tabular form. Tables are provided on crimes, arrests, processes, personnel, expenditures, and correctional actions.

Where used, population data are shown in hundreds and can be converted to original numbers by adding two zeros. For example, the state population for 1979 is shown as 226,940, which converts to a population total of 22,694,000.

REFERENCE TABLES

The individual reference tables in this section cover data for 1979 on crimes reported, adult and juvenile arrests, prosecution, and juvenile probation.

Each county publication contains jurisdictional data. The statewide publication relates to California counties.

[a] Includes both adults and juveniles.

[b] Data limitations for calendar year.

JUVENILE PROBATION

- Because of variability in reporting by the Los Angeles County Probation Department, some underreporting occurred in the latter part of 1978 and 1979. By agreement with the agency, estimates were developed that more fully represent the number of initial referrals, initial petitions, and cases removed from probation. Statewide data for these three types of transactions reflect Los Angeles County adjustments. However, offense distributions could not be estimated therefore these data for statewide and Los Angeles County are not shown.

- The number of Los Angeles County juvenile arrests referred to probation was used as a base to determine the approximate number of initial referrals, initial petitions, and removals during the year. For the first eight months of 1978, Los Angeles County initial referrals and initial petitions were proportionally consistent with juvenile arrests referred to the probation department. The last four months of initial referrals and petitions were estimated to retain that level of consistency.

- The same process was used to estimate four months of initial petitions and three months of probation removals of 1978 and one month of probation removals of 1979. These annual estimates for Los Angeles County were added to data for the other 57 counties to produce statewide figures.

DISPOSITIONS OF ADULT FELONY ARRESTS
AS REPORTED BY THE OFFENDER-BASED TRANSACTION STATISTICS SYSTEM

Characteristics and Data Limitations

- There is an important difference between arrests compiled through the Bureau of Criminal Statistics (BCS) arrest reporting system and Offender-Based Transaction Statistics (OBTS) data on the dispositions of adult felony arrests. Arrest data, as reported on the Monthly Arrest and Citation Register, are based on the year the arrest occurred. OBTS data pertain to the year of final disposition regardless of when the felony arrest occurred, and may be reported a year or more after the actual arrest was made.

- OBTS data do not reflect the total number of adult felony arrests or the total number of dispositions at any particular level of the criminal justice system during a given disposition year. It is estimated that, in 1979, OBTS reports were received by BCS for about two-thirds of the total adult felony arrests which received a final disposition during the calendar year. Despite underreporting, those arrest dispositions which were received generally describe the annual statewide processing of adult felony arrestees through California's criminal justice system. However, county and local data should be used with caution since the extent of underreporting may vary between jurisdictions and from year to year.

- In cases where an individual is arrested and charged with multiple offenses, the OBTS system records only the most serious offense at both the time of arrest and the point of conviction. The seriousness of the offense is based on the severity of possible punishment. This and underreporting account for the differences between OBTS counts and statistics generated by the Administrative Office of the Courts, which counts individual acts.

- OBTS data on commitments to state institutions from lower and superior courts may vary from data compiled and reported by other state agencies because of differences in the data collection systems. For example, the California Department of Corrections (CDC) counts the number of defendants actually received by CDC institutions (e.g., prison) even though some may have been committed from one or more counties. The OBTS system, on the other hand, counts each commitment.

[a] Includes transfers of jurisdiction from one county to another, deaths, sentences vacated, appeals that were approved, deportations, etc.

Notes: The data include only those adults placed on supervised probation.

Data are limited to original grants of probation and do not include subsequent grants of probation to persons already under probation supervision in the same county.

Persons on probation in more than one county or under the jurisdiction of both superior and lower courts are counted more than one time.

Data were obtained from summary reports (containing counts only) provided by all county probation departments except one. The Alameda County Probation Department provided computer tape records of individual reports on each probationer.
